It is only by test requirements that the qualities of a paving brick can be accurately defined. Again, a continual demand for a better quality of brick, which reliable experiments indicate can be obtained, forces the manufacturer to supply the demand by raising the standard of his product. The points which appear to establish the necessity of testing paving brick are: 1. There is no other method of determining the quality. 2. It is the only method by which the qualities demanded can be definitely and specifically stated. 3. It is the only method of judging quality which is fair to both the manufacturer and citizens. 4. The quality of the material is continually improved. It is claimed by many engineers that the fitness...
