# PARASITE-HOST INTERACTIONS IN ESTUARIES

Book Condition: New. Publisher/Verlag: Scholar&apos;s Press | Long-term survey of key macrobenthic species in a temperate eutrophic estuary and the influence of trematode parasites | Digenetic trematodes are important organisms in shallow-water ecosystems, being parasites of several other animals. These parasites may exert significant impact on the physiology of their hosts. Yet, they have rarely been taken into account in environmental studies. Trematodes are cryptic determinants of the population dynamics of their hosts, such of benthic organisms monitored in coastal...
